It is closely linked to the Coptic calendar and shares many similarities with the Egyptian calendar. Its unique features, such as its calculation of the new year, month names, and year numbering, set it apart from the Gregorian calendar widely used worldwide.

Historical Origins and Development

The Ethiopian calendar traces its origins to ancient Egyptian timekeeping systems, which were adopted and adapted by early Christian communities in Ethiopia. The calendar's current form is believed to have been established during the reign of Emperor Amda Seyon I (14th century), with significant modifications over the centuries.

Key points:

- Maintains a 13-month structure, with 12 months of 30 days and one month of 5 or 6 days (depending on leap year).

Relation to the Coptic and Gregorian Calendars

While sharing origins with the Coptic calendar, the Ethiopian calendar has diverged in several ways:

- The Ethiopian calendar is approximately seven to eight years behind the Gregorian calendar.
