Creating a New Report

The typical steps involved are:

- Navigate to the Report Writer transaction (e.g., GRR1).
- Enter a unique report name following your organization's naming conventions.
- Define the report type (e.g., standard report, drill-down report).
- Select the data source, i.e., the SAP table or view that contains the data you want to report on.
- Save your initial report before proceeding to layout design.

Designing and Developing Reports in SAP Report Writer

Step 1: Defining Data Fields

The core of any report is the data it presents. After selecting the data source:

- Use the report's field catalog to pick relevant fields.
- Add fields to the report layout.
- Ensure that data types are correctly interpreted to facilitate calculations and formatting.

Tip: Use the Field Group feature to organize related fields logically.
