Introduction to Risk Management and Insurance

Risk management is the systematic process of identifying, assessing, and controlling threats to an organization's capital and earnings. Insurance, on the other hand, is a financial instrument designed to transfer risk from an individual or entity to an insurer. These two disciplines are intertwined; effective risk management often involves the strategic use of insurance as a key tool.

Harrington and Niehaus's work emphasizes that risk management is not merely about avoiding risks but understanding and controlling them to maximize opportunities while minimizing losses.
