Introduction to Elephants

Elephants are the largest land animals on Earth. Belonging to the family Elephantidae, they are part of the order Proboscidea, which is characterized by their long trunk and large ears. 4. Thick, Wrinkled Skin

Elephants' skin is about 1.5 centimeters thick in some areas, providing protection from injuries and insect bites. The wrinkles and folds increase the surface area, aiding in heat regulation. They often bathe or spray water on themselves to keep their skin moist.
